

Applications

- Direct Mail
- Primary & Secondary Packaging
- Food and Pharmaceutical
- Marking of Plastics & PVC

Ink Classes

- Solvent
- Oil-based
- Aqueous
- Eco-Solvent
- FDA Certified

Advantages

- Inks targeted at a wide variety of substrate classes
- Close to a decade of experience formulating inks for Xaar printheads
- Consistent high quality performance assured through a rigorous stage/gate development process
- Range of application and analytical testing available for product qualification
- Strong material supplier partnerships

Sensient has a long history of creating inkjet inks for a diverse range of applications. Built upon a platform of unique chemistries, the range of market driven and customized ink formulations numbers in the hundreds. With a strong focus on commercial and industrial inkjet applications, we can provide a number of unique solutions to your particular market segment.

Direct Food and Pharmaceutical Marking

Leveraging Sensient's core technology in FDA approved colorants and GMP manufacturing, in conjunction with their knowledge of jettable fluids, application knowledge and head compatibility, we have the available solution for your unique application. Our technology allows for non-contact marking and customization for branding and product differentiation. These inks are available in a full range of colors, including specialized SPOT colors, and can be applied to a wide variety of food items such as baked goods, snack cakes, candy, and gum.

Additional Advantages of Sensient

- Flexible manufacturing process insures rapid turnaround of small and large order
- Distribution centers in Europe, China and the United States
- Experienced and dedicated technical support team
- Batch-to-batch consistency in color, quality and composition
