

The STAEDTLER group of companies, famous for the development of writing and drawing instruments of outstanding quality, is employing about 3.000 people worldwide and selling its products into nearly all countries on the globe.

Due to its long years of experience in the development and manufacture of ink for writing and drawing instruments, STAEDTLER INK JET was founded in 1984 in order to transfer the expertise onto the development and manufacture of ink jet inks.

STAEDTLER INK JET has grown ever since and is today the technological leader in ink jet inks in many fields of large format and industrial ink jet printing. Its broad range of inks includes the **patented Lumocolor Jet ink technology**, a revolutionary water-based pigmented ink which can print onto nearly all substrates.

STAEDTLER INK JET offers:

Experience in ink jet inks since 1984

Highest standards of quality through the professionalism of a global player

High speed through highly flexible organisation

Professional service with a normal response time of less than 24 hours

Confidentiality from the first contact

A world-wide network of experts

STAEDTLER INK JET is specialized in:

WE DESIGN YOUR INK

- innovative ink design for OEM partners
 - tailor-made ink solutions for industrial customers
- Even if it sounds trivial:

STAEDTLER INK JET takes your ink challenge seriously!
