

Environmental Sustainability Policy Statement

Xaar recognises the need for responsible energy and waste management and is committed to improving energy efficiency and protecting the environment. We will endeavor to minimise the impact operations at our facilities have on the environment.

Objectives

- To fully comply with the law and regulations and to take a proactive approach to future legal requirements and/or obligations.
- To reduce the emissions of greenhouse gases and conserve natural resources where we can.
- To educate and train staff members in environmental issues and in good working practices in order to create an energy efficient and environmentally aware working culture.
- To conserve natural resources wherever possible.
- To invest in energy efficient plant, equipment and buildings.
- To promote sustainable purchasing, waste minimisation and the recycling or re-use of chemicals and materials.
- To reduce landfill and promote the recycling ethos.

Implementation of the Policy

We will develop practices and initiatives across the following broad themes:

- Conservation of energy, fuel and natural resources.
- Develop and adopt sustainable purchasing practices.
- Promote recycling and waste minimisation.
- Build sustainability into the management of our facilities.
- Engage with external contacts to increase our knowledge and share our experiences of sustainability within our sector.
